Jupiter XEKURI

Complete Cyber Security Platform

INTRODUCING JUPITER

Jupiter is a managed services provider with focus on data protection, data safety, data storage, colocation and cyber security also provide services such as dedicated servers, cloud computing, private rack, private cage, fast content delivery (CDN), live streaming delivery (LSDN) and connectivity for cloud providers at affordable, reliable and good quality.

JUPITER XEKURI

Jupiter XEKURI is a complete cyber security platform provides an all-inclusive security solution for users concerned about mail and website security.

TYPES OF DDOS ATTACK BLOCKED

- ◆ TCP SYN Floods
- ◆ TCP FIN Floods
- ◆ TCP RST Floods
- ◆ HTTP GET Floods
- ◆ HTTP Post Floods
- ◆ HTTP XMLRPC PingBack attacks
- ◆ TCP Fragment attacks
- ◆ Slowloris
- ◆ TCP Syn Spoofed
- ◆ ICMP Floods
- ◆ HTTP HEAD Floods
- ◆ Brute Force
- ◆ TCP Ack Floods
- ◆ Ping of Death
- ◆ DNS NXDomain Floods
- ◆ HTTP Cache Control
- ◆ HTTP SSL Saturation
- ◆ Amplified DNS DDoS
- ◆ RUDY
- ◆ Smurf
- ◆ As well as other attacks

FEATURES

WEB APPLICATION FIREWALL

XEKURI blocks all kinds of web attacks accurately and quickly with the industry-leading logic based analysis detection technology.

DDOS PROTECTION

XEKURI mitigates and blocks DDoS attacks which attempt to exhaust resources and make websites inaccessible. Our advanced DDoS solution protects against the most common one to sophisticated multi-vector and application layer attacks such as Slowloris and R-U-Dead-Yet? (RUDY).

SSL CERTIFICATE

Besides detecting and blocking malicious traffic, XEKURI also provides free SSL certificates that encrypt communication between all visitors and the web server.

ADDITIONAL MAIL PROTECTION

Our solution has been extensively assessed on vulnerabilities and overall security architecture. The conclusion: XEKURI provides a secure email platform to customers. All email communication is performed over GDPR-compliant secure channels.

CLOUD & ON-PREMISE

XEKURI provides cloud and on-premise solutions to protect layer 3, 4 and 7.

Jupiter XEKURI

Withstand All Layer 3, 4 & 7 DDoS Attacks

ONLINE PAYMENT COMPLIANCE

Data leaks for small businesses result in heavy financial losses. With sensitive information being exchanged online, it's important that consumers' personal and financial information is well protected.

As such, all websites with a credit card payment module are required to comply with PCI-DSS 6.6 standards. XEKURI can help website owners become PCI-DSS compliant.

OWASP VULNERABILITIES

XEKURI protects against the top ten vulnerabilities identified by OWASP. To do this, we use 26 rules which allow our cloud WAF to detect and accurately block web attacks with low false positives.

OWASP
Open Web Application Security Project
