BENEFITS

BETTER CUSTOMER EXPERIENCE
Speed of access to content is consistently rated by users as the top criteria for customer satisfaction. Jupiter CDN delivers a high performance for content delivery, ensuring a better customer experience.

HIGHER REVENUE POTENTIAL
Research shows that poor responsiveness of content delivery adversely affects users' propensity to spend. For example, Amazon.com found that 100ms of extra load time for their site caused a 1% drop in sales. Jupiter CDN ensures a good responsiveness, encouraging customers to spend.

NEW REVENUE STREAMS
With Jupiter CDN, organizations can deliver a variety of content, enabling them to generate extra revenue from offering new types of content, such as live-streams.

COST EFFICIENCY
Jupiter CDN provides a very cost effective way for organization to obtain a better performance and scalability, without needing to invest heavily in infrastructure.
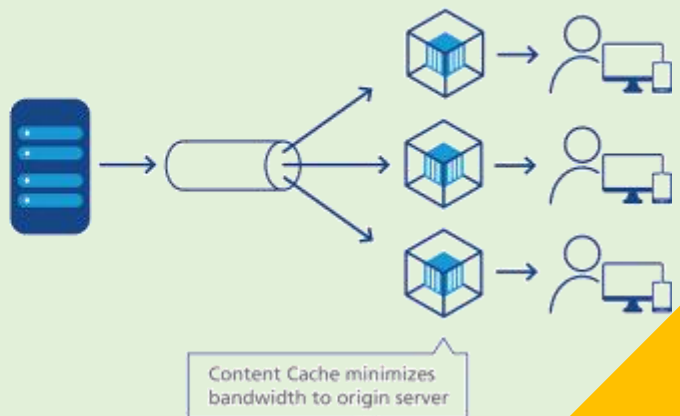

CDN FEATURES

Jupiter CDN offers some great features, including:

- ✓ Global coverage, with PoPs (points of presence) across the world.
- ✓ Fast delivery of content anywhere over HTTP, RTMP, HDS, HLS, and Smooth.
- ✓ Safe delivery to virtually any device, including PCs, laptops, tablets or mobile phones running Windows, Linux, iOS or Android.
- ✓ Handling a variety for video encoding, including industry standard H.264, with multibit rates.
- ✓ Extensive policies to protect content from unauthorized access, including IP-address restrictions, "geo-blocking" (for geographic restrictions) and token-based authentication (enabling multi-level restrictions based on business logic).
- ✓ Logging of usage for billing and analytics purposes.
- ✓ A special add-on, that makes the whole process of preparing and publishing videos very easy.

CDN SERVICES

Jupiter CDN provides the following basic services:

- ◆ **Web-acceleration** – a cost-effective way to scale a website to cope with large audiences or flash-crowds.
- ◆ **File-download** – a fast, scalable and efficient, delivery of digital assets, such as videos, software patches or games updates.
- ◆ **Video on demand (VoD)** – better quality streaming of videos, from movies to corporate or home videos.
- ◆ **Live-streaming** – a more reliable way to stream live events, including the ability to pause, rewind and resume the live-stream.
